

Software for Loan Officers

## How to install and run your Android Phone App

The Quick Qualifier phone app is free. It uses all of the settings from your online site. Because of this, it gives complete, accurate payment and closing costs calculations and it uses MI defaults and loan ceilings from your site. Unlike typical apps, this one gives complete payment details.

Download the QuickQualifier.apk file to your computer.  
[www.MortgageSoftware.com/Downloads/QuickQualifier.apk](http://www.MortgageSoftware.com/Downloads/QuickQualifier.apk)

Next, copy it from your computer to your phone. Look for it in your Downloads folder. Copy it and save it to your Phone drive (not the Card). The file is quite small.

You can also email it to your phone if you do not have a cable handy. After the file is in your phone, just tap the file and it will install the app in your phone. You will have to click the **Allow** option in your **Security** settings. It will create a shortcut that looks like this: 

If you do not see it, check your Apps folder. The first time that you run the app, you will be asked to enter your QQ Online folder name. This is usually your full name without and spaces or punctuation. It looks like this in your browser window. [www.QQWebsite.com/YourName](http://www.QQWebsite.com/YourName). Enter YourName as it is displayed in the web address.

This will let your app know how to communicate with your online site. All of your settings will be added to your phone app, including your name, contact information and closing cost defaults.

You can also update items whenever you change them in your site. Just click the Update button on the main menu of your phone app.

At this time, we only have an app for Android. An iPhone app is under construction and will be available shortly. We will notify you when it is available. You can also visit our website to watch for the release.
